

SD-6KG Pro

Fully Automatic

Drum material:	Cast Iron
Batch capacity:	3.5~7kg /batch
Roast time:	8~15 minutes/drum (after preheat at 180°C)
Cooling time:	1-2 minutes
Roast Output:	18~28kg/hour
Roasting type:	semi-hot air and half direct fire
Heating type:	LPG gas(propane)/Natural Gas
Voltage:	AC 220V 50HZ
Machine size:	2200*1300*2000mm
Machine weight:	280kg
Package Size:	
Gross Weight:	
Package:	plastic film & wooden case

SD-12KG Pro

Fully Automatic

Drum material:	Cast Iron
Batch capacity:	3.5~13kg /batch
Roast time:	8~15 minutes/drum (after preheat at 180°C)
Cooling time:	1-2 minutes
Roast Output:	18~52kg/hour
Roasting type:	semi-hot air and half direct fire
Heating type:	LPG gas(propane)/Natural Gas
Voltage:	AC 220V 50HZ
Machine size:	
Machine weight:	
Package Size:	
Gross Weight:	
Package:	plastic film & wooden case
PLC touch screen controller, full automatic	

Yoshan series industrial coffee roasters equipped with advanced PLC touch screen control system, auto electrical servo system and cylinder system realize the intelligentized operations from feeding, loading, roasting, cooling and discharging. Operator can pre-set in computer and monitors temperature, thermal power, exhaust and roasting hour in whole process. 30 years experienced installation team provide overall solutions for industrial dust and exhaust removal system. And offer service of designing and customizing the best installation method according to customers' factory layouts.

Large independent stirring plate that can cool the beans rapidly in 1-2 minutes. Realize truly continuous roasting up to 24 hours.

All industrial coffee roasters applying OMRON pneumatic servo system. Sensitive operation, low failure rate, stable and durable performance.
